

Technical details

Strength,
durability and
convenience

Makmax Architectural Umbrellas are available in a range of shapes and sizes, with logo and branding potential and they can be customised to suit each site using our wide range of accessories including heating, lighting and misting.

Our umbrellas can be installed to most surfaces including concrete footings and slabs, timber decks and boardwalks. The structures are easy to transport and arrive to site fully preassembled.

MakMax umbrellas are able to withstand strong winds with most models rated to 120km/h as standard. They also provide maximum UVA and UVB protection and feature the Triplex™ steel protection powdercoat system, state of the art fabrics and stainless steel cables and fittings.

MakMax

Strength

High frequency butt-joint welded canopy panels with tape reinforcing—the best industry practice for strength while providing an attractive smooth finish. Canopy perimeters are stitched using Tenara® PTFE sewing thread unaffected by UV, salt water, acid rain, pollutants or micro-organisms.

Durability

Our all steel frame constructions are wind-rated, commercial quality and designed to last.

Choose from a wide range of fabric and steel powdercoat colours, or opt for marine grade 316, all stainless steel frame.

Triplex™ brand steel coating system combines hot-sprayed zinc and aluminium galvanising with two layers of powdercoat: simply the best powdercoat steel protection available today.

Convenience

The PVC canopy is waterproof, UV resistant, anti-fungal, easy-clean PVDF coating industry leading fabric technology means long life with low maintenance.

Tension

Marine grade 316 stainless steel under arm cables with tension adjustment ensure membrane tension can be maintained over time.

Collapsible

With our patented lever erection system you can erect and collapse most models in seconds and there are no internal gear boxes to jam or fail.

ACCREDITATION

Our ISO 9001:2000 compliant Quality Management System (QMS) ensures absolute quality, consistency, and customer satisfaction. Our business systems, (sales, marketing, estimating, design & drafting, fabrication, manufacturing, storage, logistics and project management activities) are accredited by the Bureau Veritas Quality International Certification Services (BVQi).

CERTIFICATION

We offer clients the professional services of an in-house team of registered, practising engineers. It's another quality assurance that ensures we deliver full certification and design that meet all international standards.

SUSTAINABILITY

We proudly support many ecological initiatives. Not only does our Research & Development facility continue to produce newer, greener products such as Kenafine® and ETFE, but we also support Texyloop®, the international PVC recycling initiative. Established by Ferrari Textiles, Texyloop® recycles membrane to produce ready-to-use polyester fibre and flexible PVC for re-use within the industry.
